

AHMED MOHAMED KHALAF MOHAMED

Front-End Developer | React.js Developer

Sohag, Egypt | +20 1125388495 | ahmdalmhmwd939@gmail.com | Portfolio: 7amama.tech | LinkedIn: ahmed-m-khalaf | GitHub: github.com/ahmed-m-khalaf

PROFESSIONAL SUMMARY

Front-End Developer focused on building responsive, user-centered web applications with React, JavaScript, TypeScript, Tailwind CSS, REST APIs, and modern frontend tooling. Hands-on experience across 12+ portfolio projects covering dashboards, booking flows, e-commerce storefronts, real estate interfaces, algorithm visualization, and performance-focused portfolio sites. Strong foundation in reusable components, UI/UX principles, state management, API integration, Git/GitHub, SEO, and deployment on Netlify/Vercel.

CORE SKILLS

Frontend: HTML5, CSS3, JavaScript ES6+, TypeScript, React.js, Next.js, Tailwind CSS, Vite

State and Data: Context API, Redux, Local Storage, REST APIs, Axios, Firebase, Firestore, Recharts, Finnhub API

UI/UX and Performance: Responsive Design, Component-Based Architecture, Accessibility Basics, SEO, Performance Optimization, GSAP, Framer Motion

Tools: Git, GitHub, Netlify, Vercel, Browser DevTools, Canva

EDUCATION

Faculty of Computers and Information (FCI), Egyptian E-Learning University (EELU) - Sohag

Bachelor's Degree Candidate - Expected Graduation: 2026

PROJECT EXPERIENCE

SkyReserve X - Full-Stack Flight Booking Platform | [Live Demo](#) | [GitHub](#)

Technologies: React, TypeScript, Firebase, Firestore, Tailwind CSS, Framer Motion, GSAP

- Built a serverless flight booking platform with authentication and real-time database flows using Firebase and Firestore.
- Implemented a premium responsive UI with typed React components, Tailwind CSS layouts, and animation effects.

StockSphere - Stock Market Dashboard | [Live Demo](#) | [GitHub](#)

Technologies: React, Vite, Axios, Recharts, REST API, Finnhub API, Netlify

- Developed a responsive stock dashboard with watchlists, tables, chart-based visualization, and market insights.
- Integrated REST API data with Axios and Recharts to present financial data in a clear, scan-friendly interface.

SmartSpend - Expense Tracking Dashboard | [Live Demo](#) | [GitHub](#)

Technologies: React, Context API, Local Storage, Recharts, CSS3, Netlify

- Created a finance dashboard with transaction history, budget insights, and interactive data visualization.
- Managed lightweight client-side state with Context API and Local Storage for a smooth user experience.

DriveLux - Premium Car Rental Platform | [Live Demo](#) | [GitHub](#)

Technologies: React, Vite, Tailwind CSS, Framer Motion, React Router, Context API, Netlify

- Built a car rental experience with fleet catalog, vehicle comparison, wishlist, dashboard, and booking flow.
- Used React Router and Context API with responsive Tailwind CSS screens and polished motion interactions.

Nexora Store - E-Commerce Storefront | [Live Demo](#) | [GitHub](#)

Technologies: React, E-Commerce, Tailwind CSS, Responsive Design, Product Catalog, Vercel

- Designed a modern storefront with product catalog, product galleries, and intuitive browsing patterns.
- Structured reusable UI components and responsive layouts for a clean shopping experience.

Word Ladder Solver - BFS Algorithm Visualizer | [Live Demo](#) | [GitHub](#)

Technologies: Python, HTML5, CSS3, JavaScript, BFS Algorithm, Data Structures, Vercel

- Built an algorithm visualization tool that finds shortest word transformation paths using Breadth-First Search.
- Presented search logic and data structures through a simple browser interface for easier learning and debugging.

Additional Projects: Estate Elite, Todo List App, and My Portfolio - responsive React interfaces covering real estate browsing, CRUD task management, SEO optimization, and animated portfolio presentation.
